DETAILED ACTION

Allowable Subject Matter

1. Claims 1, and 4-20 (renumbered as new claims 1-18 respectively) are allowed.
2. The following is an examiner's statement of reasons for allowance: GB'595 is the closest reference.

Regarding claim 1, GB'595 discloses the basic elements: selecting circuitry, an instruction fetch unit, and control circuitry. However, GB'595 does not teach or fairly suggest the specific inputs and control output signal in the control circuitry as claimed, such as, a second input to receive a condition signal and a third input to receive a branch decode signal, and the control signal being based further in part on the condition signal and the branch decode signal.

Regarding claims 10 and 16, Examiner agrees with Applicants that the second mode of operation allows for a second address valid time corresponding to a second driven address, the second address valid time providing for additional memory access time, as compared with the first memory access time, within a clock

cycle in which the second address is driven. The limitation is not taught or suggested by GB `595.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. In order to reduce pendency and avoid potential delays, Group 2100 is encouraging FAXing of responses to Office actions directly into **the Group at fax number: 703-872-9306.**

This practice may be used for filing papers not requiring a fee.

It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account.

Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 2100 will be promptly forward to the examiner.
